

I understand that the FCC is soliciting public comments on NAB's petition 04-160 (this petition seeks to stop XM Satellite Radio from providing XM Instant Traffic & Weather). I would like you to reject this petition. I am a subscriber to XM radio because of the dearth of good broadcast radio in the Washington, DC area. I enjoy the music channels on XM as well as its traffic and weather channels. I pay to receive XM radio and therefore believe that there should be no limits on the type of information I receive.

Thank you very much.
Danielle Kriz
